

Southwest University

“Introduction to Web Development” Experiment Report

School: School of Computer & information Science

Major: Software engineering

Class: 4

Name: 方承煜

Student Number: 222020321062095

Experiment Report 1

No.1:Objective:

1. Master the usage of `<table>` and make a schedule
2. Update My video information website with forms(`<table>` element)
3. Try to make the page more beautiful and useful
4. Use `<input>` element and make a registration page

No.2:Detailed requirements:

1. Create a table, reasonably control its length and width, and set relevant parameters to make it more beautiful.
Ex1: a Class Schedule Card.
2. Update the previous video information website, add a table to show the broadcast time.
Ex2: Movie information.
3. Use the `<input>` element to make a beautiful and practical registration page, which requires input, selection, submission, and other functions.
Ex3: A registration page to collect user information.

Matters needing attention: Use as many learned elements as possible to expand and beautify the page while ensuring the functionality is available.

No.3:Procedure:

这一次，为苍生为伙伴也为自己而战

《姜子牙》

《姜子牙》是由霍尔果斯彩条屋影业有限公司、中传合道文化发展有限公司出品的动画电影，由程腾、李炜执导，郑希、杨凝、图特哈蒙、阎么么等担任主要配音演员。

该片讲述了封神大战之后，姜子牙因一时之过被贬下凡间，失去神力，被世人唾弃。为重回昆仑，姜子牙踏上旅途寻回自我的故事。

该电影定档于2020年10月1日中国内地、北美同步上映。

放映日期	放映时间	放映地点
2020.10.14	19: 15	橘园一舍711
2020.10.15	19: 30	橘园一舍711

}
```

A large, light blue watermark of the Southwest University logo is centered in the background. The logo is circular, featuring a stylized white emblem in the center that resembles a traditional Chinese architectural or symbolic motif. The words "SOUTHWEST UNIVERSITY" are written in a circular path around the emblem, and the year "1906" is visible at the bottom of the inner circle.

Ex3[Website Result show on 2160*1440screen]:

No.5:Analysis:

For Ex1: The first task is to ask us to use `<table>` to make a timetable, We need to make it look simple and beautiful. In this topic I have learnt a lot.

1. If I want to control the borders of the table myself, I should use “border” function. For example `<table border="2">`.
2. We can use `<table><tr><th><td>` to complete the creation of the table, the addition of rows, the two configurations of cells.
3. If we want to merge the rows / columns of the table together ,we can use “rowspan” / “colspan” to control it. For example `<td rowspan="2">`.

For Ex2: By making the video information website, I learnt how to use `<div>` to design my website, and use css to control it. I try to made some links let the website can jump to other websites and come back.

1. When I use div to design. I will write a css to control it such as `.a1{.....}` and use `<div class=" a1" >` to make it work.
2. If I want a text can jump to other website when I click it, I can use ``, such as ``
3. About input pictures, we can use `` to do it, we also can use `"align=....."` to redesign it and use alt to input some words to the pictures to introduce it.

For Ex3: In the production of website registration page, I have mastered a variety of `<input>`'s types and their usage through teaching materials and network.

1. If you just want to use css to control one of types of `<input>`, you just use `input[type="....."] {}` to control it.
2. If you want to make your div have some shadow try to add these code into your css:

```
color:#333;
filter:progid:DXImageTransform.Microsoft.Shadow(color=#909090,direction=120,strength=4);
-moz-box-shadow: 2px 2px 10px #909090;
-webkit-box-shadow: 2px 2px 10px #909090;
box-shadow:2px 2px 10px #909090;
```

3. To make your background img adapted to all the screen, use those code in your body' s css:

```
background-image:url("pic/bg.jpg");  
background-repeat:no-repeat;  
background-attachment:fixed;
```

4. Some common types of `<input>` such as "text", "password", "button", "radio" and so on.

5. If you want to make a list to choose, just use `<select name="...">` and `<option value="...">` to do it.

6. To make radios just can be chosen one of them, use the same name to named them.

Summary:

Through this study, my web development ability has been enhanced to a certain extent. I have learned more categories and functions of HTML language, become proficient in the processing ability of CSS, and improve the aesthetic of web page production. I believe I can do better in the next experiment.
